I believe in competition in the market for several reasons. Therefore; the "big guys" with all of the money, that didn't think of the idea themselves, now want to make it illegal. I ask you a question, Is that not a perfect example of the awkward thinking of a governmental agency?

I would be willing to bet that if you went to every manufacture in the U.S. and ask them if they would like to make it illegal for someone to compete against them, that everyone would immediately jump on that.

I like satellite radio. I think it is a great idea. Also, my listening of "regular radio" has decreased by 90% since I got satellite radio. I really, really like listening to music, and NOT the DJ's.

Thanks.
